

Sprint 3 Plan

Swap Wear Apparel Platform (SWAP)

Ishaan, Preethika, Justin, Hemal, Frank

Sprint End: 10/25

Revision 1

Revision Date: 11/7

The goal of this sprint is to allow users to send and receive offers for trades, view their personal profile for the posts, and be able to search for other users using a filtered search.

User Stories

User Story 1:

As a user, I want to be able to follow others and view who follows me so that I can feel the social media aspects of the application

Task 1:

Frontend - Buttons to follow and unfollow users. Time estimate ~1 day.

Task 2:

Frontend - Rendering profiles when looking at who follows you. Time estimate ~3 days.

Task 3:

Backend - Create logic for storing followers and creating endpoints for following. Time estimate ~1 day.

Task 4:

Backend - Create objects for profiles to be returned for when user looks at their following. Time estimate ~1 day.

User Story 2:

As a user, I want to view my recommended feed so that I can have a curated feed for me based upon my interests

Task 1:

Frontend - Structure the frontend to render recommended posts on the home page. Time estimate ~1 day.

Task 2:

Backend - Develop logic to find posts from the database that match the user's interests. Time estimate ~2 days.

Task 3:

Backend - Create objects for posts that will show up on the feed. Time estimate ~1 day.

Team Roles:

Ishaan - Developer

Preethika - Scrum Master

Hemal - Developer

Justin - Developer

Frank - Developer

Initial Task Assignment:

Hemal: User Story 1, Task 1

Preethika: User Story 1, Task 4

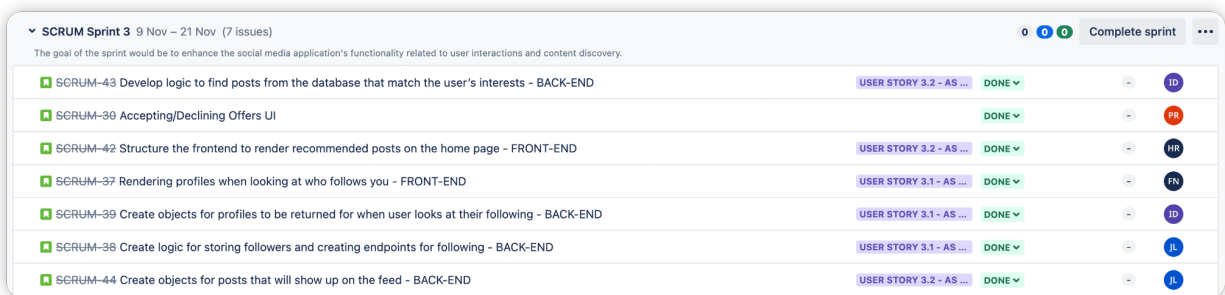

Justin: User Story 2, Task 3, User Story 1, Task 3

Ishaan: User Story 2 Task 2

Frank: User Story 1 Task 2, User Story 2 Task 1

Initial Scrum Board:

On JIRA

The screenshot shows a JIRA Scrum Board for 'SCRUM Sprint 3' (9 Nov - 21 Nov) with 7 issues. The sprint goal is to enhance the social media application's functionality related to user interactions and content discovery. All issues are in the 'DONE' column.

Issue ID	Issue Description	Assignee	Status
SCRUM-43	Develop logic to find posts from the database that match the user's interests - BACK-END	ID	DONE
