

Sprint 3 Report, SWAP, 11/21/23

- **Actions to stop doing:**

We are going to stop having meetings only twice a week so that we can give more frequent updates and improve productivity.

- **Actions to start doing:**

We are going to start telling each other when we push to main in github and what is being pushed, so that everyone and their branches are as up to date as possible. This will avoid a bunch of merge conflicts.

- **Actions to keep doing:**

We will continue having demos of our code via zoom as they greatly improve the team's understanding of each other's work and improve productivity. This helps quicken the learning curve of each other's work.

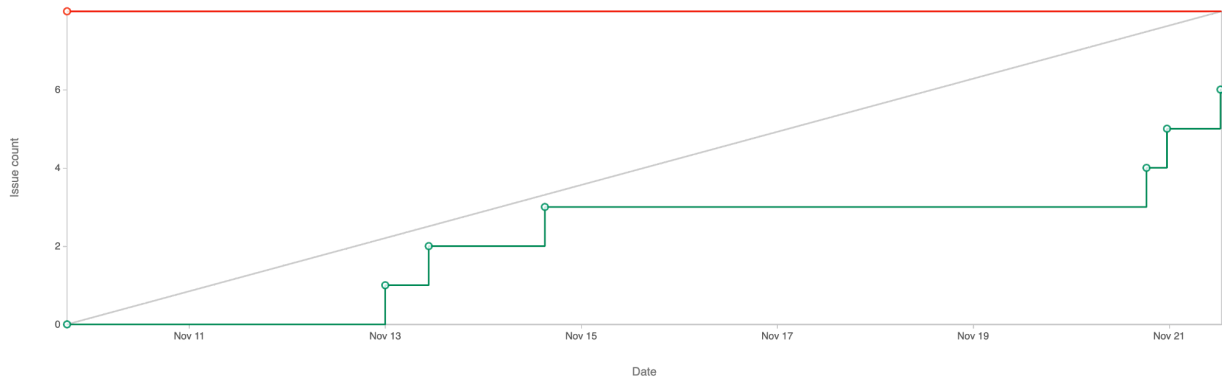

- **Work completed/not completed:**

Not completed: Offering and Accepting UI, Following Button, Rendering Pictures,

Completed: Rendering MyFollowers and Following, Following and Follower Backend, and HomeFeed backend, Accepting/Rejecting Offers Backend

- **Work completion rate:**

We completed 6 out of 9 tasks for our 2 user stories for this sprint. The only thing that we have left to do is finish the offering and accept offers UI, the un/follow button, and rendering of pictures. We completed the UI and backend for rendering of the user's following and followers, the home feed backend, and the backend for the follow/unfollow button. We spent about 10 hours each on completing our individual tasks. We completed 3 tasks, on average, for our 3 user stories. Our average work hours per day was 2 hours.

Date	Event	Issue	Completed	Scope
Thu, Nov 09 2023, 6:03pm	Sprint started	SCRUM-36 Buttons to follow and unfollow users - FRONT-END SCRUM-37 Rendering profiles when looking at who follows you - FRONT-END SCRUM-38 Create logic for storing followers and creating endpoints for following - BACK-END SCRUM-39 Create objects for profiles to be returned for when user looks at their following - BACK-END SCRUM-42 Structure the frontend to render recommended posts on the home page - FRONT-END SCRUM-43 Develop logic to find posts from the database that match the user's interests - BACK-END SCRUM-44 Create objects for posts that will show up on the feed - BACK-END SCRUM-30 Accepting/Declining Offers UI	0	8
Sun, Nov 12 2023, 11:59pm	Issue completed	SCRUM-43 Develop logic to find posts from the database that match the user's interests - BACK-END	0 → 1	8
Mon, Nov 13 2023, 10:39am	Issue completed	SCRUM-39 Create objects for profiles to be returned for when user looks at their following - BACK-END	1 → 2	8
Tue, Nov 14 2023, 3:05pm	Issue completed	SCRUM-44 Create objects for posts that will show up on the feed - BACK-END	2 → 3	8
Mon, Nov 20 2023, 6:27pm	Issue completed	SCRUM-38 Create logic for storing followers and creating endpoints for following - BACK-END	3 → 4	8
Mon, Nov 20 2023, 11:28pm	Issue completed	SCRUM-37 Rendering profiles when looking at who follows you - FRONT-END	4 → 5	8
Tue, Nov 21 2023, 12:35pm	Issue completed	SCRUM-42 Structure the frontend to render recommended posts on the home page - FRONT-END	5 → 6	8
Tue, Nov 21 2023, 11:42pm	Issue completed	SCRUM-30 Accepting/Declining Offers UI	6 → 7	8
Tue, Nov 28 2023, 12:08pm	Issue completed	SCRUM-36 Buttons to follow and unfollow users - FRONT-END	7 → 8	8
Sun, Dec 03 2023, 4:24pm	Removed from sprint	SCRUM-36 Buttons to follow and unfollow users - FRONT-END	8 → 7	8 → 7
Sun, Dec 03 2023, 4:25pm	Sprint completed	SCRUM-37 Rendering profiles when looking at who follows you - FRONT-END SCRUM-38 Create logic for storing followers and creating endpoints for following - BACK-END SCRUM-39 Create objects for profiles to be returned for when user looks at their following - BACK-END SCRUM-42 Structure the frontend to render recommended posts on the home page - FRONT-END SCRUM-43 Develop logic to find posts from the database that match the user's interests - BACK-END SCRUM-44 Create objects for posts that will show up on the feed - BACK-END SCRUM-30 Accepting/Declining Offers UI	7	7
