Sprint 2 Report, SWAP, 11/6/23

· Actions to stop doing:

We are going to stop holding meetings after class, but rather on zoom to be able to display our demos with screen sharing.

· Actions to start doing:

We will start giving each other more consistent updates about our work throughout the sprint. We shouldn't aim too high with our sprints so that our backlog is doable.

· Actions to keep doing:

We recently started screen sharing on zoom to show demos of our code and to explain how each part of our code works. Doing this has greatly improved productivity and we should continue to do this in our future sprints.
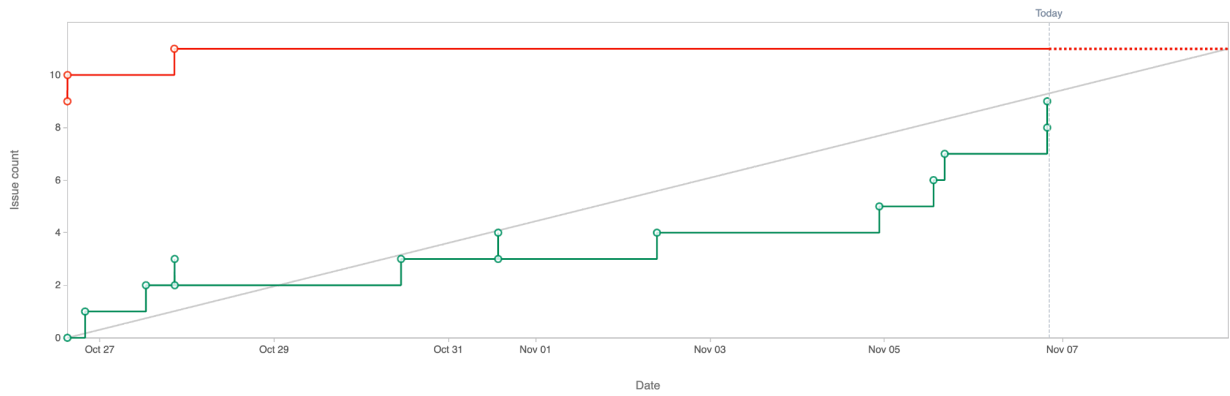

· Work completed/not completed:

Not completed: Offering and Accepting UI, rendering post pictures

Completed: Profile UI and backend, Offering and accepting backend, search UI and backend, Interests UI, Homepage UI and backend

· Work completion rate:

We completed 10 out of 11 tasks for our 3 user stories for this sprint. The only thing that we have left to do is creating the offering and accepting offers UI. We completed the UI and backend for the profile page, the home page including the search feature, interests selection page, and the backend for the offering and accepting. We spent about 20 hours each on completing our individual tasks. We completed 3 tasks, on average, for our 3 user stories. Our average work hours per day was 3-4 hours.
